

South Bay Grange

Restoration Project Update

We've completed one of the four grant-funded upgrades: electrical, insulation, siding, and windows. We have also completed the bid process for the remaining three areas, and we expect all current grant-funded work to be finished by September 2026.

As you may recall, we applied for Phase 2 of our restoration efforts and submitted another grant request to help complete that work. Unfortunately, it was a difficult budget year for the state, and like many other granges in Thurston County, we did not receive additional grant funding this round. We anticipated that this might happen, and we will try again when another opportunity becomes available.

Thanks to continued donations and fundraisers, we are able to keep making improvements where we can. There is still so much to accomplish, and we are deeply grateful for the grant funding, community support, and individual contributions that have helped move this restoration forward.

If you know of other grant opportunities, or if you would like to support the restoration through a donation, please contact the South Bay Grange at southbagrangewa@gmail.com.
